

Workshops

Workshops provide opportunity for community members to contribute and share ideas for projects aimed at preserving or improving the small town way of life so many of us value .

We would like to encourage interested community members to attend the series of Vision Workshops prepared and presented by City Planner, Alicia Ayars, and her dedicated team at SCJ Alliance. Interaction between participants throughout the presentations is made possible through a "Live Chat" option. All attendees are encouraged to provide positive input and share ideas on the topics at hand.

We are extremely pleased with the level of engagement from representatives of community, business, government and the arts. If you have a unique point of view or perspective and would like to share it, please check this page for information about upcoming workshops in the menu to your right.

With the exception of your ideas, there is no fee for attending the workshops. Thank you for your continued support of our efforts to "Implement the Vision."

Links to previous workshop materials, as well as the Q & A summaries and polling results, are provided below.
